

Delivery program of W&M – millboard

Our program of coloured millboard (grey, brown and black) could be full recycled.
 The products have very good separating attributes by laying down in automatically packing machines and we produce the whole program in the following qualities:

Board properties:

- ✓ almost completely chemical resistant
- ✓ flexible converting possibilities
- ✓ high tensile and high crush resistance
- ✓ environmental friendly due to recycability
- ✓ high elasticity and high strenght properties
- ✓ noise and heat insulating

millboard for bookbinding	:	satin glaze, calibrated frictionated
millboard design	:	pH neutral, free of acids, water refusing, waxed, coated with wax or paraffin, fire impeding millboard for punched parts, millboard extra hard millboard for boxes and upholstery
caliper size	:	1.0 mm at 700 g / m ² up to 6.0 mm at 4.200 g / m ² integrated circle shear : min 500 x 500 mm up to 1.860 x 3.360 mm plain cutted : min 25 mm up to 1.750 mm
designed	:	cutted four sides, rounded or sloped edges adaptations on customers request product certificates on request for:
after	DIN 53110	: retaining of corrosion promoting
	DIN 53124	: disposing of declaration of pH value in aqueous extracts
	DIN 53125	: disposing of chloride in aqueous extracts
	DIN 53127	: disposing of water solubled sulfat in paper and Millboard
	DIN 53129	: inclusion of water and flowing of thickness
	DIN 75200	: FMVSS 302 heavy inflamable millboard
